

**Lesson Critique**

Student's Name: Jenny Nesite. Date: 28-8-12.  
Subject/Topic: Maths - Geometry Year: 7  
Mentor Teacher/Supervisor: Deb Taylor.

**Commendations**

- + Brainstorming session at beginning of lesson was excellent and focussed their thinking as well as establishing what they knew.
- Website was good and although you got a bit convoluted in the explanation, you were able to use this to clarify the terminology.
- + Excellent supervision of chn as they completed the written tasks.

**Recommendations**

- \* You recovered well with the terminology - just try to be clear and concise with explanations and well aware of alternative names/terms used in different texts!

**Overall Impression**

Well done - the chn worked steadily and increased their knowledge of angles and terminology. You are very positive and encouraging but also insist on accuracy and <sup>correct</sup> completion which is great.
